Mezzanine

Maximize Space. Improve Efficiency. Expand Smartly.

STRUCTURAL MEZZANINES

Transform unused overhead space into valuable storage, office, or production areas without expensive renovations. A D Mezzanine provides durable, customizable, and cost-effective mezzanine solutions designed for industrial, commercial, and warehouse applications.

KEY FEATURES

- Heavy-Duty Steel Construction – Engineered for strength, stability, and long-lasting durability.
- Custom Load Capacities – Supports up to 250 PSF, with options for heavy-duty applications.
- Modular & Expandable – Flexible designs allow future expansion or reconfiguration.
- Safe & OSHA/CSA Compliant – Equipped with staircases, handrails, and safety gates.
- Multiple Decking Options – Choose from steel grating, bar grating, or wood decking.
- Easy Integration – Compatible with conveyors, shelving, and material-handling systems.

IDEAL FOR:

- Warehouses & Distribution Centers – Optimize storage and workflow.
- Manufacturing Plants – Expand work areas for production or assembly.
- Retail & Commercial Spaces – Add office space or showrooms.
- Automotive & Aerospace Facilities – Create maintenance and equipment storage zones.

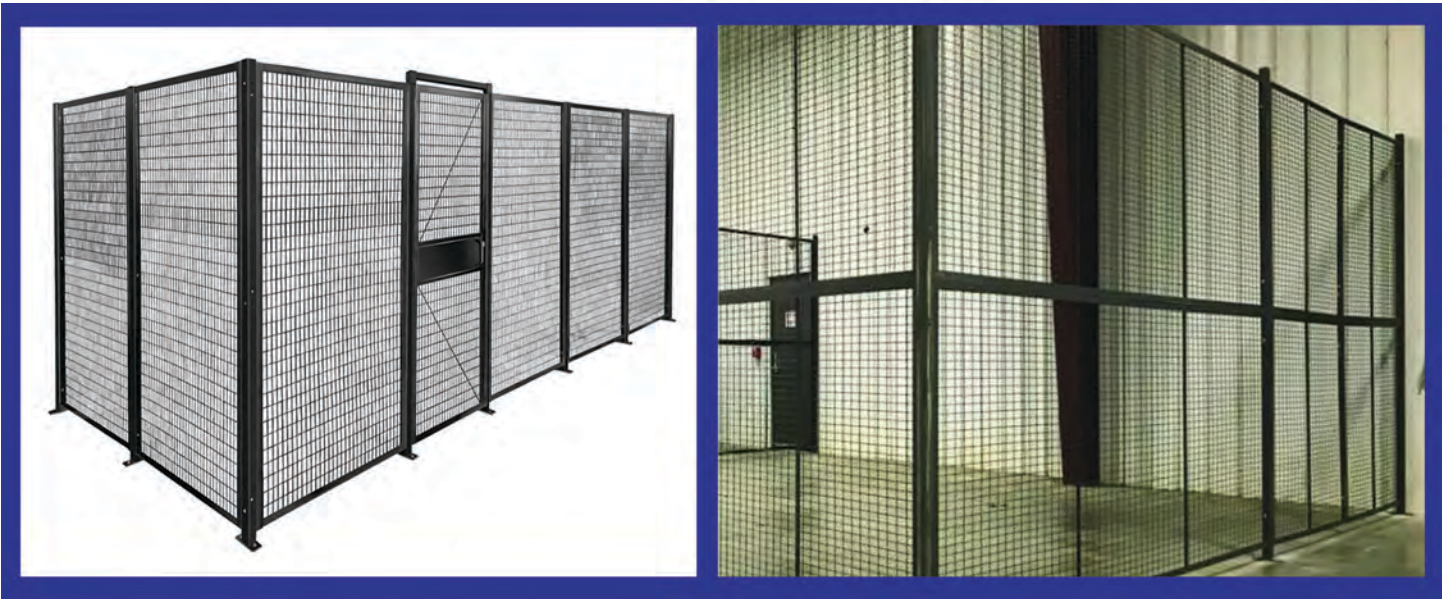

WHY CHOOSE A D MEZZANINE?

- Maximize Vertical Space – Utilize overhead space efficiently.
- Cost-Effective Expansion – No need for expensive facility renovations.
- Quick Installation – Prefabricated components ensure minimal downtime.
- Custom-Built Solutions – Designed to meet your specific operational needs.

MEZZANINE OPTIONS

- Free-Standing Mezzanines – Heavy-duty, open-floor design for maximum flexibility.
- Rack-Supported Mezzanines – Built over existing shelving for efficient storage.
- Building-Supported Mezzanines – Integrated with existing structures for space optimization.

Wire Mesh Partition or Steel Fencing Solutions

Secure, Durable, and Built to Last

At AD Mezzanine, we craft fencing solutions that deliver unmatched security and durability for industrial, commercial, and storage applications. Our fences are made from high-quality steel materials, providing a robust barrier that ensures safety without sacrificing visibility.

Key Features & Specifications

Posts: Fabricated using 2" x 2" seam-welded square steel tubes for maximum structural integrity.

Panel Frame: Built from 1¼" x 1¼" 16-gauge structural angle steel for superior support and stability.

Panel Fabric: Constructed with 2" x 2" x 10-gauge welded wire mesh - strong, durable, and built to last.

Doors (Swing/Sliding): Reinforced for long-term durability with easy-to-use locking systems for added security.

Finish: Powder-coated or galvanized for corrosion resistance and long-lasting performance.

Why Choose AD Mezzanine Partition or Steel Fencing?

Maximum Security: Heavy-duty steel construction for superior protection.

Reinforced Structure: Sturdy posts and frames provide enhanced durability.

Customizable Design: Tailored heights and dimensions to fit your specific needs.

Clear Visibility: Wire mesh design ensures airflow and easy monitoring.

Easy Installation: Modular system for quick setup and seamless integration.

Ideal Applications

Industrial Facilities: Secure machinery and hazardous zones.

Warehouses: Protect inventory and control access to storage areas.

Construction Sites: Safeguard equipment and materials on-site.

Retail Storage: Secure valuable goods while maintaining visibility.

Public Spaces: Effective crowd control and safety barriers.

Installation Tip

For enhanced security and stability, anchor posts into concrete using heavy-duty bolts and ensure all access points are fitted with reinforced locks.

Wire Machine Guards

Engineered for Safety. Built for Durability.

Protect your employees and equipment with AD Mezzanine's Wire Machine Guards designed for industrial strength and workplace safety. Our guards create a reliable barrier around hazardous machinery, ensuring compliance and peace of mind in high traffic environments.

Key Features

Heavy-Duty Construction by AD Mezzanine:

Reinforced 1 1/2 " X 1 1/2" x 1/8" Structural angle wire mesh panel with 2" X 2 " Square opening for superior strength.

Post: 2 " X 2 " X 1/8" Square tube welded to 1/4" thick base plate for maximum stability.

Secure & Accessible Design:

Hinged doors for easy entry and operational convenience.

Padlockable for enhanced security and control.

Compliance You Can Trust:

Meets all OSHA and ANSI safety standards.

Designed with a 6" floor clearance for effortless cleaning and maintenance.

Product Specifications

Posts: Heights: 5 1/2' and 7 1/2' Base Plate Size: 6" x 6"

Panels: Heights: 5' and 7' Width Options: 2' to 8'

Doors: Heights: 5' and 7' Width: 4'

Why Choose AD Mezzanine's Wire Machine Guards?

Superior Protection: Safeguard employees from hazardous equipment.

Built to Last: Manufactured with industrial-grade materials.

Easy Installation: Pre-engineered for quick setup and long-term reliability.

Fast Shipping & Hassle-Free Setup

All orders shipped with mounting hardware included for quick installation.

AD Mezzanine—Protecting Your People, Preserving Your Productivity.

BOLLARDS

Reliable Protection. Engineered for Strength.

Enhance safety, control traffic, and protect valuable assets with AD Mezzanine's Heavy-Duty Steel Bollards. Built for industrial, commercial, and public spaces, our bollards are designed to withstand high-impact forces while maintaining structural integrity. Choose from round or square designs to match both functionality and aesthetic needs.

Types of Steel Bollards

1. Round Steel Bollards

- Classic appearance ideal for traditional environments.
- Smooth, cylindrical design for consistent protection.
- Commonly used in parking lots, walkways, and public spaces.

2. Square Steel Bollards

- Modern, structured design for a bold visual barrier.
- Offers strong visual presence and increased deterrence.
- Ideal for industrial facilities, storefronts, and high-security areas.

Key Features & Specifications

Material: Constructed from heavy-duty steel for maximum durability and impact resistance.

Height Options: Standard size 48"

Dimensions:

Round Bollards: Diameter from 4" round tube X 1/8" thick welded with baseplate 10" X 10" X 1/2" with 4 hole 5/8"

Square Bollards: 5" x 5" with baseplate 10" X 10" X 1/2" with 4 hole 5/8"

Finish: Powder-coated in OSHA safety yellow for high visibility, with optional reflective strips for added safety.

Mounting Styles:

Fixed: Permanent protection for high-risk areas.

Removable: Flexible option for temporary access control.

Retractable: Space-saving solution for adjustable use.

Base Plate Dimensions: 10" x 10" with pre-drilled holes for secure anchoring.

Impact Protection: Designed to absorb and deflect vehicle impacts, safeguarding structures, equipment and pedestrian zones.

Applications

Traffic Control: Manage vehicle flow and prevent unauthorized access.

Pedestrian Safety: Protect walkways, storefronts, and outdoor areas.

Industrial Protection: Safeguard equipment, loading docks, and warehouse areas from forklift damage.

Security Measures: Shield sensitive locations from potential vehicle intrusion.

Why Choose AD Mezzanine Steel Bollards?

- Built from 100% heavy-duty steel - no plastic, concrete, or polymer materials used.
- Custom sizes and finishes available to meet your specific requirements.
- Engineered for durability and long-lasting protection in high-traffic environments.
- Easy installation with pre-drilled base plates and anchor bolts included.

Rack Protectors

Heavy-Duty Protection for Racks, Shelving, and Workplace Safety

Protect your warehouse racks and shelving from costly damage with AD Mezzanine Rack Protectors. Engineered for industrial environments, these durable barriers defend against impacts from forklifts, pallet jacks, and other material-handling equipment. Built with heavy-duty steel and designed for maximum visibility, they ensure structural integrity, minimize repair costs, and enhance workplace safety.

Key Features

Heavy-Duty Steel Construction

- Crafted from 1/4" thick high-strength steel for superior impact resistance.
- Sturdy uprights welded to 7" deep base plates for enhanced stability.
- Powder-coated OSHA yellow finish for high visibility and corrosion protection.

Advanced Impact Protection

- Engineered to absorb impacts from forklifts and pallet trucks.
- Maintains rack and shelving integrity in high-traffic warehouse zones.

Customizable Safety Solutions

- Available in various heights from 12" to 48" for tailored protection.
- Flexible configurations, including end-of-aisle guards, column protectors, and post protectors.
- Designed to withstand up to 10,000 lbs of impact force.

Why Choose AD Mezzanine Rack Protectors?

- Heavy-Duty Durability: Built for the toughest industrial environments.
- Cost-Saving Protection: Reduces damage-related repair costs and extends the lifespan of racking systems.
- Enhanced Safety: Helps prevent structural damage, protecting both employees and inventory.
- Easy Installation: Secure setup with included anchor bolts for quick deployment.

Ideal for Industrial and Commercial Spaces

- Warehouses: Protect pallet racks from accidental collisions.
- Distribution Centers: Maintain inventory safety in busy aisles.
- Manufacturing Facilities: Reinforce shelving systems in high-traffic zones.
- Retail Storage Areas: Safeguard shelves and improve employee safety.

Built to Industry Standards

Complies with OSHA and ANSI safety regulations.

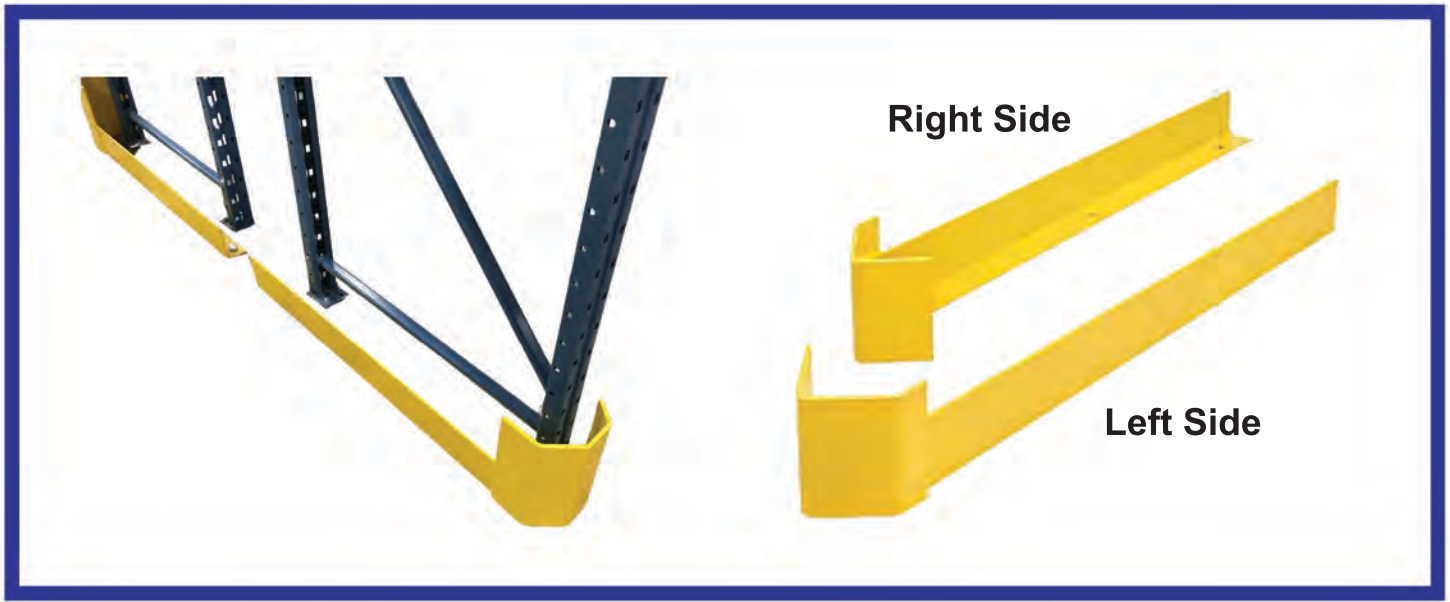

Manufactured with ASTM A36-grade steel for exceptional strength.

Powder-coated finish ensures long-lasting corrosion resistance.

Invest in AD Mezzanine Rack Protectors for unmatched durability, safety, and peace of mind engineered to protect your assets and streamline operations.

End-of-Rack Protectors

Safeguard your warehouse investments with AD Mezzanine's End-of-Rack Protectors - engineered to prevent costly damage from forklifts and material-handling equipment. Designed for durability and visibility, these protectors are essential for maintaining rack integrity and enhancing workplace safety.

Key Features

- Heavy-Duty Construction
- Made from extra heavy-duty 3/8" all-welded steel for superior impact resistance.
- 8" high corners offer robust protection for rack ends.

High Visibility for Safety

- Finished with OSHA-compliant powder-coated yellow for enhanced visibility and accident prevention.

Easy Installation

- Comes with anchor bolts included for secure and hassle-free installation.

Why Choose AD Mezzanine Rack Protectors?

- Prevent Damage: Shields rack sides and fronts from forklift impacts.
- Built to Last: Durable steel construction ensures long-term performance.
- Enhanced Safety: Reduces accidents, protects staff, and keeps inventory secure.

Perfect for Various Applications

- Warehouses: Prevent forklift damage to pallet racking.
- Distribution Centers: Protect valuable inventory from accidental collisions.
- Manufacturing Facilities: Safeguard shelving in high-traffic areas.
- Retail Storage: Improve workplace safety and maintain organized inventory spaces.

Built to Meet Industry Standards

- Compliant with OSHA and ANSI safety regulations.
- Powder-coated for corrosion resistance and long-lasting durability.

Protect your investment and ensure a safer workplace with AD Mezzanine's End-of-Rack Protectors - Engineered for strength, designed for safety.

Safety Curbs

Heavy-Duty Protection for Your Workplace.

Safeguard your machinery, racks, and inventory from forklift damage with AD Mezzanine's Safety Curb. Designed for durability and maximum protection, this robust solution is essential for high-traffic industrial environments.

Key Features

Built Tough for Industrial Use:

Constructed from extra heavy-duty 5/16" thick steel for superior impact resistance. 5" height offers optimal protection against forklift collisions.

High Visibility for Maximum Safety:

Finished in OSHA-compliant powder-coated yellow for clear visibility and accident prevention.

Customizable Lengths:

Designed to line up end-to-end for extended coverage and longer runs.

Easy & Secure Installation:

Comes with anchor bolts included for a quick, hassle-free setup.

Why Choose AD Mezzanine's Safety Curb?

- Prevent Costly Damage: Protects your equipment, inventory, and facility structures from forklift accidents.
- Built to Last: Manufactured from industrial-grade steel for long-term durability.
- Highly Visible: Bright yellow finish minimizes risks and ensures a safer workspace.

Perfect for Various Applications:

- Warehouses
- Manufacturing Facilities
- Distribution Centers
- High-Traffic Industrial Zones

Ready for Fast Shipping & Easy Setup

With included anchor bolts and a straightforward installation process, securing your facility has never been easier.

AD Mezzanine - Strengthening Safety, Protecting Your Business

PROTECT YOUR BUSINESS WITH A D MEZZANINE GUARD RAILS

Maximize Safety | Minimize Damage | Built to Last

Heavy-Duty Guard Rail Solutions

Ensure workplace safety with A D Mezzanine's high-impact guard rails. Designed for industrial and commercial environments, our guard rails provide maximum protection for people, equipment, and property.

KEY FEATURES FOR MAXIMUM PROTECTION

Heavy-Duty Steel Construction – Post 5" X 5" X 1/8" Welded to base plate 10" X 10" X 1/2" with 4 holes 5/8"

Rail Lengths – 12" X 1- 1/2" X 1/4" Structural C- Channel

OSHA-Compliant Safety Yellow – High-visibility finish prevents accidents and resists corrosion.

Superior Impact Resistance – Withstands 10,000 lbs or more, perfect for forklift-heavy areas.

Quick Installation – Pre-drilled base plates for fast, secure mounting.

Indoor & Outdoor Use – Optional hot-dip galvanized finish for rust and corrosion resistance.

IDEAL FOR:

Warehouses & Factories – Protect machinery, inventory, and staff.

Parking Lots – Define pedestrian zones and prevent vehicle overruns.

Retail & Commercial Spaces – Safeguard storefronts and outdoor areas.

Public Areas – Direct foot traffic and prevent accidental falls.

WHY CHOOSE A D MEZZANINE GUARD RAILS?

Built to Last – Impact-resistant steel for long-term protection.

High Visibility – OSHA-compliant yellow finish reduces accident risks.

Customizable & Adaptable – Designed to fit various layouts & safety needs.

Regulation-Compliant – Meets OSHA & industry safety standards.
